

Nataly Lopez

714-833-6049 | nataly.lopez@berkeley.edu | [linkedin.com/in/nataly](https://www.linkedin.com/in/nataly) | [Personal Portfolio](#)

EDUCATION

University of California, Berkeley

Berkeley, CA — Graduating May 2028

Bachelor of Arts in Cognitive Science and Data Science - Emphasis in Business

- **Honors:** Regents & Chancellor's Scholar (Top 1% of UC Berkeley), Yardi Scholar, Harvard WeCode Fellow
- **Relevant Coursework:** Artificial Intelligence, Data Structures, Efficient Algorithms & Intractable Problems, Discrete Mathematics & Probability Theory, Designing Information Devices & Systems

EXPERIENCE

Invariant LLC | Software Engineer & Strategy Consultant

June 2026 – Present

- Delivered an end-to-end Risk-as-a-Service (RaaS) platform for enterprise clients by engineering a high-performance FastAPI and JavaScript web portal.
- Guaranteed zero-defect data ingestion across complex risk metrics by implementing strict Pydantic validation schemas and SQLite persistence.
- Accelerated risk analyst workflows and frontend visibility by building secure REST API endpoints for version tracking and assessment locking.
- Guided corporate strategy for Fortune 500 enterprise clients (e.g., Apple, Microsoft) by delivering political consulting and market analysis.

Qualcomm | Machine Learning Engineer (Contract)

January 2026 – Present

- Shaped edge AI product roadmaps by benchmarking latency and throughput of the IQ-9075 vs. NVIDIA Jetson Orin, delivering gap reports to stakeholders.
- Accelerated developer time-to-value across 5 AI inference workflows by designing and pitching a pre-configured "Day 1 Golden Image" strategy.
- Reduced ML environment setup time by 90% (4.5 hours to 20 minutes) by containerizing the inference stack via Docker and deploying an INT4-quantized pipeline.

UC Berkeley, Chief Technology Office | Product Manager

August 2025 – Present

- Managed the end-to-end product lifecycle and directed an engineering team to ship 5 React.js web applications for major organizations (e.g., Berkeley Mobile, ColorStack), serving 20,000+ users.
- Boosted user retention by 12% across all platforms by analyzing user interaction data to prioritize, scope, and ship high-impact product features.
- Reduced front-end technical debt by 30% and accelerated sprint velocity by contributing production code, standardizing design-to-engineering handoffs, and leading code reviews.

Datack Inc. | Data Science & Market Research Intern

May 2025 – August 2025

- Engineered a quantitative scoring framework for 100+ leads, reducing evaluation cycles by 20% and improving reporting efficiency.
- Synthesized complex technical data into executive-level presentations to bridge engineering and business units for strategic growth.

LEADERSHIP & PROJECTS

RetentionOps Churn Intelligence Engine | Python, XGBoost, Streamlit, Git

January 2026

- Spearheaded an end-to-end XGBoost inference engine and "What-If" dashboard to shift retention strategy from reactive reporting to predictive intervention, simulating 10+ customer attributes to drive business decisions.
- Deployed a low-latency (<20ms) production app via Streamlit Cloud using a 0.5 risk threshold to automate tiered response strategies (Stable, Elevated, Critical) for save-desk operations.

UC Berkeley, Haas Women in Business Case Competition | 2nd Place Winner

October 2025

- Led a 4-person team to design and pitch an AI-powered reverse mentorship MVP, utilizing NLP to achieve 90% matching accuracy and projecting a 35% increase in engagement.

SKILLS INTERESTS

Languages & Frameworks: Python, SQL, JavaScript, Java, C/C++, HTML/CSS, React, FastAPI

Product & Data Tools: Figma, GCP, Jira, Git, Docker, Pandas, Scikit-learn, Streamlit, XGBoost

Interests: Posting on my Substack (@username), Running 5ks, Learning Korean/French, Tetris, Cafe-Hopping
